GAME STEERING WHEEL

DONGGUAN LANGMING INTELLIGENT TECHNOLOGY CO., LTD

COMPANY PROFILE

Founded in 1998, the company has dedicated over two decades to the R&D and manufacturing of interactive entertainment hardware, with its business spanning major global markets including the United States, Europe, Japan, and East Asia.

Its main product lineup covers accessories for PS4/PS3, Xbox One/Xbox 360, Nintendo Switch, Android, and PC platforms, including high-performance racing wheels, professional-grade controllers, customized Switch controllers, PC flight sticks, and arcade joysticks. Leveraging strong R&D capabilities and exceptional manufacturing expertise, the company continually introduces innovative products that meet player demands and align with industry trends.

The self-owned brand "DOYO" has earned widespread acclaim and trust from users worldwide, thanks to its superior quality, exquisite craftsmanship, and highly competitive value proposition.

In terms of quality and sustainable development, the company strictly complies with international standards and systems such as ISO 9001, ISO 14001, SGS, RoHS, and REACH. It has established comprehensive quality control and environmental management systems to ensure every product meets first-class international standards.

Patent/Certificate Earned

80 in total

(including 35 that have been approved)

Product research and development

2 new products per year

More than one million US dollars are invested in research and development every year

Product Distribution Worldwide

Sold in **126** countries and regions

It covers major global markets such as the United States, Europe, Japan and East Asia.

Industry development

More than **20** years

NBCP[®]

FOCUS ON RESEARCH AND DEVELOPMENT

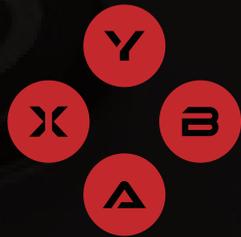

We are among China's earliest manufacturers specializing in gaming peripherals, with over two decades of dedication to the R&D and production of interactive entertainment hardware. Equipped with independent R&D capabilities and self-built production facilities, our integrated industrial chain covers LED design, mold manufacturing, plastic injection molding, SMT mounting, and complete product assembly. Every step of the process strictly adheres to international manufacturing standards, ensuring that our products consistently lead the industry in both quality and innovation.

1 million/years

More than one million US dollars are invested in research and development every year

20⁺ years

of industry experience

50000000⁺
key reliability tests

TEST

48 hours
of aging testing

100000000⁺
joystick rotation tests

96 hours
of high and low temperature testing

CORPORATE

CORPORATE MISSION

We are always committed to enhancing the player experience, constantly developing and producing outstanding game products, and working hand in hand with global users to create an immersive entertainment future.

MISSION

ENTERPRISE POSITIONING

COMMITTED TO THE GAMING INDUSTRY

we aim to be a leading Chinese manufacturer and exporter of gaming peripherals with a global reach.

PRODUCT INTRODUCTION

GAME STEERING WHEEL

PRODUCT

Industrial-Grade Performance, Born for Champions. With extreme responsiveness, whisper-quiet operation, and unparalleled durability, it meets the most demanding needs of professional esports and serious sim racers.

EEL

***PRODUCT
INTRODUCTION***

**GRIP THE REALISM
CONQUER THE TRACK!**

Move beyond controllers and experience professional-level driving simulation. From the moment you press the accelerator, you are in command.

PRODUCT INTRODUCTION

Direct Drive Force Feedback Wheel

D8

Product features

A servo direct drive wheelbase is more than an upgrade; it's a revolution in simulation racing. It removes the final barrier between you and the virtual car, translating cold data into a vibrant tactile conversation. Choosing direct drive means choosing to experience the track as a true driver.

Direct Drive Power · Zero Loss Transmission
Industrial-Grade Durability
Aluminum alloy racing trigger
Seismic force feedback
1080° Rotation, True-to-Life Control.

Prêtez un coup de main sur www.ecoconsolemobilier.fr.

A 7-SPEED DOWNWARD-PRESSING GEAR LEVER

Convenient and stable, it brings you a truly enjoyable gear shifting experience

PRECISION-CRAFTED BASE ROCK-SOLID STABILITY

Unwavering under full force feedback, delivers the most authentic track force

LINEAR HALL FOOT PEDAL REPLACEABLE SPRING

Hall Effect Pedals
Precision in Motion

ALUMINUM ALLOY PICK

Smooth gear Shifting Comfortable Experience

Four aluminum alloy Hall magnetic pull plates offer a lighter touch, faster response, weakened powertrain, and smooth and continuous gear shifting when cornering

HIGH-GRADE LEATHER COMFORTABLE AND DELICATE

THE HANDLE IS MADE OF CAREFULLY SELECTED LEATHER WITH EXQUISITE STITCHING AND COVERING TECHNIQUES, PROVIDING A SMOOTH TOUCH

Core Configuration

Compatibility:	PC	Rated power:	72W
Rotation Angle:	270°	Input voltage:	110V~220V
Vibration:	Dual-motor force feedback	Maximum refresh rate:	1000Hz
Paddle Shifters:	Four paddles	Display:	4.3-inch OLED Display (Built-in elite software)
Buttons:	Multiple custom keys	Grip material:	Rubber coating
Steering system:	Servo direct drive	Maximum torque:	5-10Newton metre
Shell material:	Aluminum alloy		
Shell color:	black		
Fixed method:	Clamping type		

270° Formula vibration steering wheel

D5

Product features

Easy to Start, Fun that Lasts. Designed for racing enthusiasts, it offers control far beyond a standard gamepad at an accessible price. With a sturdy clamp system, you're ready to race anytime, anywhere. Dual Vibration Motors, Feel the Roar. Built-in force feedback vibration lets you feel every skid, crash, and rumble strip, taking your gaming immersion to the next level.

Hall electromagnetic drive system

PS5 wired game controller

WE

Product features

Designed for players who prioritize stability and precision, this PS5 wired controller delivers a tournament-ready gaming experience with its high-speed USB-C connection for low-latency data transfer, ensuring instant response to every command.

The controller combines a smooth material with a comfortable grip, providing stable handling even during extended gameplay. High-precision analog sticks and responsive buttons offer accuracy and durability, making it ideal for intricate maneuvers in action, shooter, and fighting games.

Equipped with PS5-exclusive adaptive triggers and immersive haptic feedback, the controller realistically replicates weapon resistance, environmental effects, and movement vibrations, pulling players deeper into the game world.

Additionally, it features a 3.5mm headphone jack and a touchpad, enabling voice chat and versatile control options. The controller supports cross-platform connectivity and can be easily used with PS5 and PC devices. Since it is wired and powered directly via USB, there's no need for batteries or charging—making it an ideal choice for competitive gaming and long entertainment sessions without interruption.

Wireless game controller

X2 / X9

Product features

This PS4 wireless controller is built for flexibility and immersion, delivering a more liberated gaming experience. With Bluetooth wireless connectivity, players can break free from cable clutter and enjoy low-latency, stable control across a wide variety of games.

Featuring an ergonomic design and non-slip texture, the controller remains comfortable to hold even during long sessions. The high-precision analog sticks and responsive buttons ensure smooth and accurate input—whether you're in a fighting game or a competitive shooter, performance remains optimal.

The built-in six-axis sensor and dual vibration motors enhance interactivity and immersion, while the touchpad and dynamic light bar expand both gameplay possibilities and visual expression. Players can perform intuitive touch-based actions and experience shifting in-game atmospheres through customizable lighting effects.

Additionally, the controller supports a 3.5mm headphone jack and includes a built-in speaker for real-time voice chat and immersive audio. Its rechargeable battery offers long-lasting performance and supports play-while-charging, so the fun never has to stop.

How to remove and replace the PS5™ console cover

Place your console on a soft cloth spread over a flat surface before removing or attaching the covers.

Each cover has different shapes. To ensure you attach the cover in the correct position, use the action button marks on the inside of the cover as a guide.

All covers can be removed and attached in the same way.

Step 1

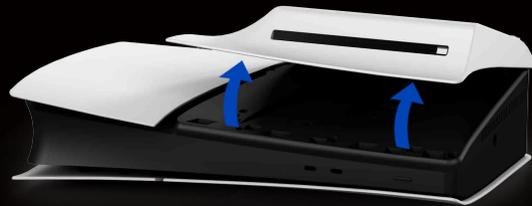

Go to the control centre and select Power > Turn Off PS5. The screen goes blank, the power indicator flashes white, and then turns off.

Step 2

Remove the AC power cord and cables, and then wait for the PS5 console to cool down. The main unit of your console is hot immediately after use.

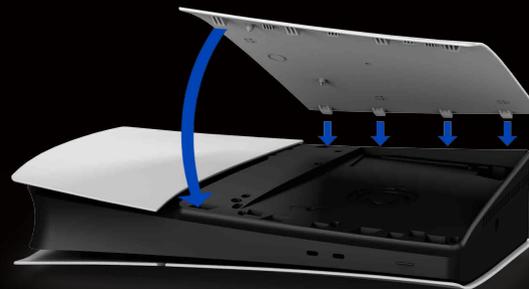

Step 3

Place the console with the bottom facing up and the front side facing you, and then remove the feet.

Step 4

Remove the cover. Slightly lift the cover away from the console to detach its clips and remove it.

Step 5

Attach the cover. Align the cover's clips with the corresponding holes on the console and push in until you hear a "click".

Step 6

Attach the feet, connect the AC power cord and cables, and then turn on the power.
